PROJECT/EXPERIENCES

JCSES Parent & Project Management System (Full-Stack Developer)

- Designed and developed a web-based management system for managing parent-student records, PTA projects, and financial transactions.
- Implemented secure user authentication with role-based access control for administrators, parents, and school officials.

Gown Rental Management System (Back-end Developer)

- Designed and implemented a gown rental management system for handling inventory, reservations, rentals, and payments.
- Implemented rental scheduling and reservation logic to prevent double bookings.

Simulation of Patient Flow in a Hospital Referral System (Simulation Developer)

- Designed and simulated a hospital referral system to analyze patient flow across registration, consultation, referral, and treatment stages.
- Modeled patient arrivals using exponential distributions and service times using normal and uniform distributions.
